

Express line for transport of LCL shipments between China and Middle Europe region

Advantages of express line for transport of LCL shipments between China and the Czech/ Slovak Republic

- Railway transport competes with any other transport
- Transport time is three times shorter than maritime transport
- Regularity of lines, four times a week in Westbound and three times a week in Eastbound
- Option to use main part of logistics chain(railway) separately

Following prices are indicative only and they apply for import to/export from the Czech Republic. They will be adjusted to quantity and frequency of shipments and also in relation to weight and measurement of shipment.
